### Oracle Certified Senior Application Developer

11 full-life cycle implementations	e-Business suite Expert	APEX / HTMLDB
iStore	SQL / PL/SQL	project manager
strong web development	Oracle technology stack	multiple operating system platforms

**Customizing e-Business Suite using Oracle supported, CEMLI compliant, "Customization by extension".**

I am a talented independent consultant working with clients and business owners to identify their needs and provide complete solutions. **I have worked with most of the 200+ modules that Oracle offers.**

### Skills Matrix

### Functional & Technical Project Management

Oracle Module – Most used	Latest Version Used	Oracle Module – Most used	Latest Version Used
e-Business Suite	12.2.4	Payables	12.2.4
Advanced Pricing	12.2.4	Process Manufacturing	11.5.10
Advanced Supply Chain Planning	12.2.4	Projects	11.5.10
Alert	11.5.10	Purchasing	12.2.4
Application Report Generator	12.2.4	Quality	12.2.4
Applications BIS	11.5.10	Quoting	12.2.4
Assets	12.2.4	Receivables	12.2.4
Bills of Material	12.2.4	Self-Service Web Applications	11.5.10
CRM	12.2.4	Service	11.5.10
Cash Management	11.03	Shipping Execution	12.2.4
Configurator	11.03	Shop Floor Management	12.2.4
Customers Online	12.2.4	System Administration	12.2.4
Demand Planning	11.5.10	TeleSales	11.5.10
Financial Analyzer	11.5.10	Time and Labor	11.5.10
General Ledger	12.2.4	Trade Management	11.5.10
Incentive Compensation	11.5.10	Universal Work Queue	12.2.4
Inventory	12.2.4	Warehouse Management	12.2.4
Manufacturing	12.2.4	Work in Process	12.2.4
Master Scheduling / MRP	12.2.4	e-Commerce Gateway / EDI	11.5.10
Order Capture	12.2.4	iPayment	11.5.10
Order Management	12.2.4	iStore	11.5.10
		iSupplier Portal	11.5.10

Other Tools / Languages	Other Tools / Languages	Other Tools / Languages
PL/SQL	Toad	Oracle SQL Loader
HTMLdb/APEX/Jquery	Java	Data Pump
Oracle Reports 2.5,6,10g	JDeveloper	Discoverer
Oracle Forms 4,5,6,10g	Oracle XMLDB	SQL Developer
HTML	JavaScript	Portal 8i & 9i
MySql	PHP	Angular
Wordpress / Oracle integration	Magento / Oracle integration	

u Excellent knowledge of Oracle Applications and extensive experience with Oracle APIs and Interfaces.

## Recent projects

### Recently created Portals

Allows Customers And Vendors to Review Status Of Orders, Invoices, Purchase Orders & Submit Request for Quotes

Allows Salesreps to Review Status of Orders For Their Territories, Submit Request for Quotes & Submit Follow-up Information

Allows Customers & Salesreps to Review Shipments and Drill Directly to UPS, FedEx etc. Tracking Websites

Allows Shop Floor Personnel to Access, Review And Update WIP Jobs and Shop Floor Travelers

- ◆ Purchasing – Created web based Receiving / Inspection ranking report with ability to create the receiving transactions directly from the web form.
- ◆ iStore – using Oracle's APEX product Created entire iStore front end with full Oracle Apps security. Integrated with all APIs necessary (i.e. Pricing, Add to Cart, Shopping Lists, Checkout and Order Capture).
- ◆ iStore – Modified many iStore pages and java packages to meet the needs of various clients also created custom search and add to cart functions.
- ◆ iStore – Created custom system to maintain and setup iStore items/categories/pricing and created iStore front end customer facing web site with shopping cart and checkout with full integration with Oracle's iStore and Order Capture back end without the need to deal with Oracle's iStore front end. Allows for more rapid site development and control over navigation, look and feel.
- ◆ Work in Process – Workbench to manage all aspects of WIP Jobs, can release, reschedule, print travelers, move, and complete jobs. Also able to review all components, operations, resources and shortages.
- ◆ Publishing – Built system that client uses to create, edit and publish news articles easier and faster, client is now able to expand the subjects reported on.
- ◆ Process Manufacturing - Created OPM Production Scheduler with drag and drop calendar scheduling giving the client the ability to visualize the load across production lines and reschedule accordingly.
- ◆ Mobile Apps - Salesreps can review and track customer orders/shipments and check inventory levels on the road and also place orders for their customers from their phone.
- ◆ Created app for vendors to enter Quality results before shipping parts from overseas, allowing the client to approve or reject shipments, images and attachments can also be loaded for review of either the client or the vendor.
- ◆ Web Based Aging and Collections Workbench. Allows accounting department to perform advanced searches and review customer aging, calls and contacts. Collection calls can be made and information entered in the webpage and the data interfaces directly into the Oracle standard tables.

## Data Conversion / APIs

- ◆ Conversions from legacy systems to Oracle Applications, as well as, interfaces between existing systems and 3<sup>rd</sup> party software.
- ◆ Developed various data conversion techniques for rapid consistent repeatable results and taught process team members to understand requirements.
- ◆ Used many Oracle APIs to load Legacy data and integrate external and internal systems. (see API matrix)

## API Matrix

Receivables	Manufacturing	Purchasing/Payables
Parties	Items	Vendors
Sites/Addresses	Categories	Sites
Contacts/Phones	Costs	Purchase Orders
Tax Locations	Xrefs	Payables Invoices
Invoices / History	Container Items	Approved Supplier List / Sourcing Rules
Salesreps	Categories	Requisitions
Commissions	UPC Codes	
	Locators	PA Transaction Interface
	Bom / Bom Components / Structures	Workplan
	Routers/Resources	Structures
	Wip Jobs (Load, release, move, close)	Tasks
	WEB Based WIP Workbench	Task Assignments
		Expenditures
Order Management/ Shipping	Process Manufacturing	iStore / Order Capture
Load Orders / Quotes and Lines	Create Items	Advanced pricing
Schedule and release	Lot Conversions	Add to cart
Ship confirm / Backorder / Cancel	Costs	Checkout and interface to OM
Advanced Pricing	Whse / Production Rules	Create user
EDI	Formulas / Operations / Routings /	Create Customer
WEB Based Picking and	Routing steps / Recipes	Create Address
Shipping workbench	Burdens	Custom item category hierarchy
Full integration with UPS Worldship	Full batch control	
with automatic ship confirm and	Production scheduling	
Freight charge interface.		

## Platforms & Hardware

- ◆ UNIX, Linux, Windows: Proficient in all aspects required to install and maintain Oracle Applications, connectivity, and redundancy.
- ◆ Brands: Proficient on most major brands of servers, hardware architecture and options.
